B.Tech. (Computer Science and Engineering)
Semester-IV
Subject: Database and Management System
Subject code: BCO010B
Marks: 64

CO1: Awareness of database management basics and different models that we use for database

Unit # 1
Tutorial sheet 1

Sec-A (5x2=10 marks)

1. What do you understand by DBMS?
2. What is E-R model?
3. Explain the importance of transaction management.
4. Define all relationship notations?
5. Explain the difference between data and information.

Sec-B (3x7=21 marks)

6. What are the different parts of DBMS Languages? Also explain their commands.
7. Describe the concept of keys in DBMS also Explain the types of keys with example.
8. Explain the System Architecture of DBMS.

Sec-C (3*11=33 marks)

9. What are DB Models on which DBMS is operated? Explain all in detail.
10. Compare and Contrast file Systems with database system.
11. Draw the E-R diagram of University Management system.
